Automatic Transfer Switch Equipment
M2Rxxx-110/2

- PC-Class change-over switch
- Dual power supply design: power supply A (main) and power supply B (standby)
- Supports AC systems with a rated current of 6 A to 100 A
- Automatic switching within 100 milliseconds
- Compliance: IEC 60947-6-1

The M2R Automatic Transfer Switching Equipment (ATSE) is a PC-class miniature power transfer device designed for residential applications. It supports dual power inputs from a main and a backup source. In the event of a main power failure or abnormality, the device automatically transfers to the backup power within 100 milliseconds, ensuring continuous and reliable power supply. It is suitable for low-voltage AC systems rated from 6 A to 100 A at 50/60 Hz, features DIN rail mounting, and complies with IEC 60947-6-1:2021 standards.

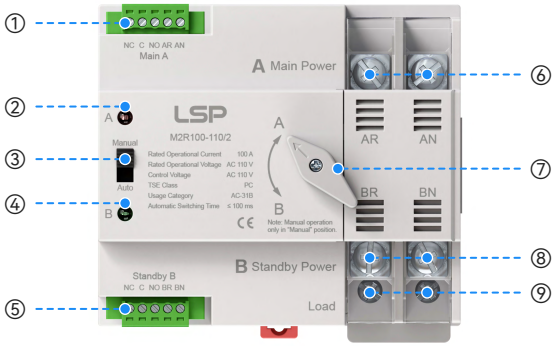
Product Overview



① Composite Terminal Block for Main Power A (Signalling & Motor Supply)
② Main Power Indicator
③ Manual / Automatic Selector Switch
④ Standby Power Indicator
⑤ Composite Terminal Block for Standby Power B (Signalling & Motor Supply)
⑥ Main Power Terminals (Main Power Input)
⑦ Manual Rotary Switch
⑧ Standby Power Terminals (Standby Power Input)
⑨ Load Terminals (Power Output to Load)
